Description

If cloakroom storage is used by both regular and occasional guests, the combined coin/card operated LOC 300 lock is the ideal solution. The cloakroom locker can be operated using either a card or coins. The guest selects a locker by self-service. Members can operate the lock using their club membership card, non-members insert a coin deposit. The key is released after insertion of the club membership card or a coin.

The locker can be used by several members consecutively since the card is removed after use and thus the locker is available again. Like this, a permanent occupation of the locker is prevented.

Using LOC 300, you will be able to efficiently organise your storage system and to offer your guests an optimal service. The guest can rest assured that her/his personal belongings are stored safely.

LOC 300 offers your guests the highest level of protection due to its resistant and vandal-proof housing.

LOC 300 - your advantages

» selection of various models: coin operated locker, card operated locker, combined coin/card operated locker
» ideal locking system for changing room lockers, safety deposit boxes, ski lockers, etc.
» safe storage of the guests' personal belongings
» easy and convenient handling
» resistant and vandal-proof housing
» all materials used in the inside of the lock are stainless
» long service life even under difficult conditions (e.g. damp rooms)
